

### Permission to Use Sunscreen at Preschool

During preschool we use the playground every day that we are able. We ask that sunscreen is applied prior to attending class. However, we realize that sometimes sunscreen is not applied, or if you have a full day child, that the sunscreen may have worn off. The preschool uses a spray-on Water Babies spf 50 by Coppertone (or generic equivalent) and will provide sunscreen unless otherwise instructed below.

I \_\_\_\_\_(name) give permission for the preschool staff to apply the stated sunscreen to the exposed skin of my child \_\_\_\_\_(name) on days when the UV index is high. If my child requires special sunscreen, I will provide the preschool with a labeled bottle of sunscreen.
